The following is an examiner's statement of reasons for allowance: The prior art does not disclose a breech device for an archery bow, including a body having an elongated outer surface; a trigger slidably mounted on the outer surface; a bowstring keeper at the front; cooperating shoulders on the trigger and keeper; the trigger being axially slidable to a first position where the keeper can be moved to a cocked position, and to a second position to engage the two shoulders and release the keeper to a firing position; and a haft means for pulling the body to draw the bowstring, the haft means attached to the body by a spring which imparts lost motion at a selected draw force.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
